GSR TECHNOLOGY AND INKWELL DATA AGREE A PARTNERSHIP TO DELIVER IoT GATEWAYS ABLE TO OPERATE ON MULTIPLE TRANSMISSION TECHNOLOGIES AND ALTIOR ENABLED

London, UK – Desio, Italy. November 2021

GSR Technology Italy was founded in 2010, by a team of determined, creative individuals, motivated by a shared spirit of enterprise and initiative.

Over the years, GSR Technology Italy has forged a strong rapport with its customers, offering high-tech products that have been designed and manufactured through the implementation of the latest technologies available in Embedded Solutions, LCD, Touch, customised hardware/software Solution, Wireless Solution and ODM products.

GSR Technology Italy is able to provide technical support and hardware/software integration services.

Inkwell Data Limited aims to democratise digital twins and enable businesses of all size to benefit from IoT solutions. At the core of this aim is its middleware platform, Altior.

Altior enables the creation of digital twins of any communicating device or asset and to transfer these instances over any transmission technology. This approach enables users to scale quickly and remain agile as technology and legislation change.

Inkwell Data and GSR Technology Italy today announce a partnership to target the European Utilities and the general industrial IoT markets. GSR Technology Italy has the pleasure to introduce new and innovative intelligent gateways that are integrated with Multiple Protocols, including Zigbee 3.0, Z-wave, LoRa, Bluetooth 5.0, Wi-Fi dual band 2.4 GHz/5GHz, wM-BUS and LTE 4G (EU/AU/US/CN, etc.).

These IoT gateways GTW810 and GTW360 for indoor and outdoor applications are based on the NXP CPU platform with multi-core processor and good balance of consumption and performances, they support Windows 10 IoT, Linux and Android OS and enable all users to address their specific needs with a quicker and faster time to market.

"We are delighted to announce that GSR Technology Italy have become an Altior Ecosystem Partner and look forward to working with GSR in the field of connected utility solutions. This is a real technological leap for end users and partners alike, enabling customers to benefit from integration across LoRaWAN as well as any other established transmission protocol. Our middleware platform, Altior, was designed from the start to enable digital IoT solutions of our partners and end-users, at very large scale".

Massimo Cesaro, CTO and co-founder of Inkwell Data Ltd.

"GSR Technology Italy has the advantages of unique scalability and flexibility. The GSR team can offer standard as well as full customised IoT integrated system solutions with the highest quality
