

## **Trilliant and Inkwelldata Partner to Enhance IIoT and Technology Value for European Utilities at Both the Device and Network Levels**

**Frankfurt, Germany -- Enlit Europe -- November 29, 2022** – Trilliant, a leading international provider of solutions for advanced metering infrastructure (AMI), smart grid, smart cities and IIoT, today announced that it is adopting partner Inkwelldata's digital twins solutions to complement its UnitySuite head end system.

Inkwelldata is an Italo-British Company which has developed and deployed a carrier-grade robust digital twin middleware platform - Altior - for Industrial IoT applications.

Altior enables the creation of digital twins of any communicating / smart device in a faster manner than conventional methods. It ensures the secure transfer of digital twin instances over any of Trilliant's agnostic communication approaches, and enhancing through live dashboards device and network visualisation, ensuring Trilliant's power of choice is foremost enabled to our customers.

Through the adoption of Altior, Trilliant will enhance its ability to deliver its complete suite of smart grid solutions over any current or future device or transmission technology, in an agnostic manner, at speed and at scale. The company will feature the capabilities of Altior at the Enlit Europe 2022 conference, November 29 – December 1, at their booth #12.1.F74, located on Exhibition Floor 2.

'Trilliant's mission has always been to deliver the highest value possible to our utilities customers, built on our proven, best in class solutions and industry experience. Our partnership with Inkwelldata will enable us to accelerate the adaptability and go-to-market of our smart grid solutions. We truly value their collaboration, reliability and innovation,' said Ian Heath, Trilliant's Vice President, EMEA.

'We are delighted to partner with Trilliant in the field of smart utilities, where they have established a strong global market presence. Our middleware platform, Altior, was designed from the start to enable the digital IIoT solutions of our partners. We look forward to continuing to work with Trilliant's EMEA team to accelerate the adoption and outcomes of IoT,' added Massimo Cesaro, CTO and co-founder of Inkwelldata Ltd.

### **About Trilliant**

Trilliant empowers the energy industry with our unique device-agnostic communication platform that enables utilities and cities to securely and reliably deploy any application on one powerful network. Our purpose-built portfolio has been designed to offer our customers the power of choice, without risk of being 'locked in' with one technologies provider or meter manufacturer. Customers worldwide benefit from Trilliant's unique combination of flexibility, reliability and sustainability for utilities and cities and the communities they serve every day.

## **About Inkwell Data**

Inkwell Data offers holistic data transfer solutions for any data in motion, over its middleware IoT platform, Altior.

Altior operates over all the main transmission technologies and can be integrated into any cloud or app solutions, as well as tailored VPS hosted cloud infrastructure, as required.
